

# 16-CH Digital Output Module – Modbus RTU

## Specifications

Channels	16 Digital Outputs
Output Type	Relay Output (Potential Free)
Load Capacity	2A Resistive / 2A Inductive
Maximum Voltage	250VAC / 30VDC
Status Indicator	16-Channel LED
Power Supply	24VDC (Field Power)
Communication	Modbus RTU
Addressing	DIP Switch
Isolation	Relay Isolation
Installation	35mm DIN-Rail
Certification	CE Certified

## Features

- 16-channel relay digital output module
- Potential-free relay contacts
- Supports both AC and DC loads
- High reliability industrial relays
- LED indication for each output channel
- Modbus RTU communication for remote control
- DIN-rail mountable compact design
